

Company CEO: _____

Product demonstration station officials: _____

Company Name

Safety	
Check here if the company has their PASSED safety inspection card	
Companies without their safety inspection PASSED card cannot participate in the product demonstration.	
Check here if the company presented you with a JSEA (Jobsite Safety Environmental Analysis)	JSEA Points
	0 5
Check here if float matches photo taken at safety inspection	
Companies must use the same vehicle, float, and other devices that went through the safety inspection.	
Total Safety (out of 5)	
Total	

Organizational and Operational Effectiveness (up to 10 points)	Points	
Up to 4 points - Teamwork/Collaboration & Communication		
Chain of command evident	0	1
Roles clear and executed well	0	1
Composure under pressure	0	1
Supportive of each other and communicate well with each other	0	1
Up to 2 points - Project Management		
Task plan is prepared for recovery of float	0	1
Preparation for graphing data recovered from the float	0	1
Up to 2 points - Problem Solving & Ability to Deal with Obstacles		
Awareness of float movements	0	1
Readiness to troubleshoot and adapt if issues arise	0	1
Up to 2 points - System Design & Control/Electrical		
Float is deployed by the end of the set-up period	0	1
Float is operational and prepared to perform tasks	0	1
Total		
Total Organizational and Operational Effectiveness (out of 10)		

Task # 4: MATE Floats Under the Ice (up to 70 points)		Points		
3.1 up to 70 points – Design and construct an operational vertical profiling float				
5 points – prior to the competition, design and construct a vertical profiling float		0		5
5 points – float communicates with the station prior to descending		0		5
up to 40 points – float completes two vertical profiles				
Vertical Profile #1				
up to 10 points – float completes 1st vertical profile		0		10
10 points – using a buoyancy engine				
5 points – using a different mechanism				
5 points – float maintains a depth of 2.5 meters for 30 seconds		0		5
5 points – float maintains a depth of 40 centimeters for 30 seconds		0		5
-5 points – float breaks the surface or contacts the ice sheet			-5	
Vertical Profile #2				
up to 10 points – float completes 2nd vertical profile		0		10
10 points – using a buoyancy engine				
5 points – using a different mechanism				
5 points – float maintains a depth of 2.5 meters for 30 seconds		0		5
5 points – float maintains a depth of 40 centimeters for 30 seconds		0		5
-5 points – float breaks the surface or contacts the ice sheet			-5	
up to 10 points – after recovery, float communicates with the station				
10 points – float communicates all data packets		0	5	10
5 points – float communicates at least one data packet				
up to 10 points – profile is graphed as depth over time		0		10
NOTE: If a company does not design and construct a float, or the float does not communicate data after recovery, companies may graph MATE-provided data. Companies may still get points above for completing vertical profiles. Graphing MATE data replaces the float communication all data packets to the shore station (which will confirm maintaining depth; companies cannot show they maintained depth from MATE data) and graphing the data points above.				
10 points – MATE-provided data is used to graph depth over time		0		10
Total Task # 3 (out of 70)				Total

Penalty Points (deduct 5 points for each infraction)	No. of Infractions	
Safety: Product demonstration officials may deduct points for safety violations. Minor violations are a 5 point penalty. Major violations may be 10 or more points. Product demonstration officials may also disqualify a company for extreme safety violations. Note: An official's decision to disqualify a company due to safety concerns is final. If there is a safety concern, please contact the lead safety inspector or competition coordinator.		
Debris: Companies that leave debris (e.g. parts of their float, including weights and flotation) in the pool at the end of the product demonstration time, or leave debris that a diver must retrieve will receive penalty points.	a	
Note: Do not include penalty points for the float breaching the surface or touching the ice. Those penalty points should be included into the point total for Task #4.		
Total Penalty Points	(total a) plus safety violations	Total
	X5=	

There is no time bonus for the MATE Floats! Task at the World Championship.
