| ROV deployed by the end of the 5-minute set-up period                        | 0            | 1 |
| ROV is under control of pilot and prepared to perform tasks                  | 0            | 1 |
| <b>Total Organizational and Operational Effectiveness (out of 10)</b>        | <b>Total</b> |   |

**Fuses:** ROV systems are allowed one replacement fuse during the product demonstration. In the event that the ROV system blows the second fuse during the demonstration, time will stop, the demonstration run will be over, and no additional points will be earned. Companies should have adequate replacement fuses on hand, MATE will not provide replacements.

| <b>Task # 2: SmartAtlantic (up to 80 points)</b>                                  | Points |              |
|-----------------------------------------------------------------------------------|--------|--------------|
| <b>2.3 up to 20 points – Testing Whale Safe Fishing Gear</b>                      |        |              |
| <b>10 points</b> – turn handle to simulate acoustic release of the retrieval buoy | 0      | 10           |
| <b>up to 10 points</b> – recover the lobster pot to the surface, side of the pool |        |              |
| <b>5 points</b> – recover the lobster pot off the bottom                          | 0      | 5            |
| <b>5 points</b> – return the lobster pot to the surface, side of the pool         | 0      | 5            |
| <b>2.4 up to 15 points – Recover the Buoy Anchor</b>                              |        |              |
| <b>10 points</b> – attach a recovery line to the buoy anchor                      | 0      | 10           |
| <b>5 points</b> – return the line to the surface, side of the pool                | 0      | 5            |
| <b>2.5 up to 45 points – Service the Holyrood Subsea Observatory</b>              |        |              |
| <b>up to 15 points</b> – recover the old eDNA sensor                              |        |              |
| <b>5 points</b> – recover the old sensor to the surface, side of the pool         | 0      | 5            |
| <b>10 points</b> – analyze the sensor's data to determine the percent frequency   | 0      | 10           |
| <b>up to 20 points</b> – install a new eDNA sensor                                |        |              |
| <b>10 points</b> – place the new eDNA sensor in the designated area               | 0      | 10           |
| <b>10 points</b> – connect the new eDNA sensor to the Holyrood subsea observatory | 0      | 10           |
| <b>10 points</b> – remove biofouling from the Holyrood subsea observatory camera  | 0      | 10           |
| <b>Total Task # 2 (out of 80)</b>                                                 |        |              |
|                                                                                   |        | <b>Total</b> |
|                                                                                   |        |              |

| <b>Task # 3: Wind-Powered Offshore Oil Platform (up to 60 points)</b>                     | Points |              |
|-------------------------------------------------------------------------------------------|--------|--------------|
| <b>3.1 up to 30 points – Micropile Installation</b>                                       |        |              |
| <b>10 points</b> – place a bubble curtain device around the micropile designated location | 0      | 10           |
| <b>10 points</b> – guide a micropile to the designated location                           | 0      | 10           |
| <b>10 points</b> – pull a pin to release the micropile                                    | 0      | 10           |
| <b>3.2 up to 30 points – Powering an Oil Platform From a Wind Farm</b>                    |        |              |
| <b>5 points</b> – retrieve the power connector from the wind farm subsea station          | 0      | 5            |
| <b>10 points</b> – lay the power connector cable through a waypoint                       | 0      | 10           |
| <b>5 points</b> – remove the cover from the oil platform                                  | 0      | 5            |
| <b>10 points</b> – install the power connector into the oil platform port                 | 0      | 10           |
| <b>Total Task # 3 (out of 60)</b>                                                         |        |              |
|                                                                                           |        | <b>Total</b> |
|                                                                                           |        |              |

| Penalty Points (deduct 5 points for each infraction)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | No. of Infractions                            |       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|-------|
| <b>Safety:</b> Product demonstration officials may deduct points for safety violations. Minor violations are a 5 point penalty. Major violations may be 10 or more points. Product demonstration officials may also disqualify a company for extreme safety violations. <b>Note: An official's decision to disqualify a company due to safety concerns is final. If there is a safety concern, please contact the lead safety inspector or competition coordinator.</b>                                                                                                      |                                               |       |
| <b>Tether Pulling:</b> Company members cannot pull on the tether to assist in moving or turning the vehicle. Judges should issue a warning for the first infraction and begin deducting points AFTER the first infraction.                                                                                                                                                                                                                                                                                                                                                   | a                                             |       |
| <b>Illegal communication:</b> Company members at the side of the pool may not communicate visual evidence of the ROV status such as location of vehicle, need to turn, that the vehicle is stuck, etc.                                                                                                                                                                                                                                                                                                                                                                       | b                                             |       |
| <b>Debris:</b> Companies that leave debris (e.g. parts of their ROV, including weights and flotation) in the pool at the end of the product demonstration time, or leave debris that a diver must retrieve will receive penalty points. Mission props deployed into the pool <b>ARE NOT</b> considered debris. Unless otherwise noted, mission items to be recovered or replaced <b>ARE</b> considered debris. A company constructed collection basket is considered debris if it is still in the water, not under control of the ROV, when product demonstration time ends. | c                                             |       |
| <b>Diver Assistance:</b> Any diver assistance (if available) must be requested by the company and will result in a 5 point penalty. The clock does not stop during diver assistance.                                                                                                                                                                                                                                                                                                                                                                                         | d                                             |       |
