| Hazard | Priority | Recommended Controls |
|--------|----------|----------------------|
|        |          |                      |
|        |          |                      |
|        |          |                      |
|        |          |                      |
|        |          |                      |
|        |          |                      |

Priority 1: High - Must be addressed before work commences.

Priority 2: Moderate - Controls must be put in place as work commences or changes.

Priority 3: Low - Risk of injury is low; exercise caution and use proper PPE.
